# *Installation Procedures*

## *Link-11 Segment*

---

The appropriate Operating System and DII COE Kernel must be properly installed prior to loading core and application segments.

! TAC-3/TAC-4

OS: HP-UX 10.20

Kernel: DII COE 3.0.1.0

! Sparc 10/20

OS: Solaris 2.5.1

Kernel: DII COE 3.0.0.3P2

The Link-11 segment contains the Link-11 Interface C with both passive and active capabilities. To enable the active two-way capability, load the L11Adm segment.

Use the **Segment Installer** option within DII COE SysAdmin to load segments.

The following table shows the loading dependencies for Link-11:
